On 16 December 2019, the Joint Sully District Land Use and Transportation Committee (JSDLU&TC) heard several presentations. This summarizes the position taken on the Milestone Wireless Telecommunications Facility (Monopole) (2232-Y19-8)

The JSDLU&TC, in general, supports Wireless Telecommunications Facilities (Monopoles). However, after careful consideration of the application and based upon views expressed by the project area residents in attendance at this meeting, the Committee has identified the following concerns with this application:

- Is this the optimum location for the tower?
- Is there sufficient separation from the tower and residential development?

Until these concerns are resolved, the Sully District Joint Land Use and Transportation Committee objects to the approval of this proposal.

Yours respectfully,

Jeffrey M. Parnes
Land Use and Transportation Committee Chair
Sully District Council of Citizens Associations
